

Where you can buy our books:

If they are not available over Amazon or you wish to buy them by other retailers and bookstores, here you can see our distribution partners across the globe:

We are using a distribution network to make our titles available to over 39,000 bookstores, online retailers, libraries, and schools. Through this relationship, we send title data feeds and title availability status to these channel partners. Each channel partner independently determines whether to list a title and how to display that title's availability on their website.

United States

- Our titles are automatically made available to more than tens of thousands of retailers, libraries, schools, e-commerce companies, and other channel partners, including Amazon, **Barnes & Noble**, **Chapters/Indigo** (Canada), and other well-known book retailers and wholesalers
